TAY SHON DA

Kuala Lumpur ● tayshunda@gmail.com ● (+60) 16-5251740

PROFILE SUMMARY

Motivated undergraduate with a strong foundation in Python and TypeScript. Passionate about LLMs, Agentic AI, Computer Vision and IoT. Demonstrated ability to build practical AI applications using modern frameworks like LangChain, Hugging Face, and PyTorch. Seeking an internship in Artificial Intelligence or Machine Learning to apply technical skills in contributing innovative software solutions, from 9th March 2026 to 21st August 2026.

EDUCATION

Bachelor of Computer Science (Software Engineering) with Honours Oct 2022 – Sep 2026
University Malaysia Pahang Al-Sultan Abdullah
- CGPA: 3.80
- Dean's List Recipient (All Semesters)

RELEVANT COURSEWORK

Machine Learning Applications | Artificial Intelligence Techniques | Applied Statistics | IoT Data Integration

SKILLS

Programming Languages
Python | TypeScript | Dart

Libraries & Frameworks
PyTorch | Scikit-Learn | Hugging Face | LangChain | MCP

Web Development Frameworks
Next.js | Laravel | Flutter | FastAPI

DevOps & Tools
Git | Linux | Docker | Node-RED

Languages
English (Fluent) | Malay (Fluent) | Mandarin (Fluent)

PROJECTS

Deepfake Image Detection & Deployment | Final Year Project
- Performed Low-Rank Adaptation (LoRA) fine-tuning on pre-trained deepfake detection models using the Hugging Face ecosystem.
- Optimized the models for specific image datasets to improve classification accuracy.
- Containerized the application using Docker and deployed the final model to Hugging Face Spaces.

Malaysian SPM History Textbook RAG Pipeline | Personal Project
- Developed an asynchronous RAG system using LangChain and Supabase (Vector DB) to answer queries regarding Malaysian SPM History Textbook.
- Engineered a custom Markdown-aware text chunker with Qwen2-1.5B embeddings to preserve page-level context and enable accurate source citations.

- Integrated Groq and OpenRouter for LLM inference, optimizing the pipeline for low-latency and context-aware response generation.

Yahoo Finance MCP Server | Personal Project
- Built a custom MCP server using the yfinance library.
- Enabled LLM clients to contextually retrieve real time stock market data via tool calling autonomously.
- Configured the server to work seamlessly with LLM clients for real time financial analysis.
